List of Figures and Tables

Figures

2.1 The incentive function $\gamma B(M, H)$	17
3.1 Sample path of rate of return and rate case initiations	29
3.2 Solution to valuation equation with different regulatory controls, x_l	31
3.3 Solution to valuation equation with different regulatory controls, x_u	32
4.1 Welfare and transactions costs	49
11.1 Econometric cost models without financial models	179
11.2 Economic cost models integrated with financial models	134
11.3 Structure for TFM integration	192

Tables

2.1 Illustrative values for the productivity incentive scheme	18
3.1 The cost of capital as a function of x_l and x_u	33
3.2 The expected time to the next rate case	34
3.3 Relative revenue requirements associated with control	35
3.4 Maximum and minimum stock prices associated with control	36
3.5 Probability of earning x before initiating a rate case from x_l	37
3.6 The effects of earned rate of return variability	38
4.1 Welfare effects of transactions costs	50
4.2 Prisoner's Dilemma model	51
4.3 Requested versus allowed return on equity	54
4.4 Costs per customer for most current rate case	55
4.5 Average time between filing and award	56
4.6 Outside consulting expenses by category	56
4.7 Involvement of state appointed intervenor	56
4.8 Definition of variables	57
4.9 Results of regression runs	59
5.1 Public utilities' common stock issues	64
7.1 Multi-product cost function parameter estimates	95
7.2 Estimated marginal cost by customer class	96
7.3 Cost interdependency at the expansion point	97

7.4	Parameter estimates for Ramsey numbers	98
7.5	Pricing hypothesis tests	98
8.1	Estimates of selected parameters of translog cost function in private firms	120
8.2	Estimates of selected parameters of translog cost function in public firms	121
8.3	Marginal cost estimates in private firms	122
8.4	Marginal cost estimates in public firms	123
8.5	Data for evaluating pricing efficiency in private firms	125
8.6	Data for evaluating pricing efficiency in public firms	126
8.7	Relative social welfare weights	127
8.8	Mean value of selected cost variables	129
8.9	Cost comparisons for evaluating production efficiency	130
9.1	Variable definitions	139
9.2	Direct elasticities – demand equation	143
9.3	Direct elasticities – demand equation: new results	144
9.4	Elasticity estimates – new models (adjusted data)	146
9.5	Elasticity estimates – new models (unadjusted data)	147
9.6	Direct elasticities – demand: pooled cross-section results	149
9.7	The model without restrictions	151
9.8	Test of the appropriate price variable	152
10.1	Performance and cost parameters for gas-fired chillers/heaters and electric chillers	162
10.2	Ratio of the annualised energy costs of gas cooling to electric cooling	166
10.3	Ratio of the annualised life-cycle costs of gas cooling to electric cooling	166
10.4	Ratio of the annualised energy costs of gas cogeneration/ cooling to electric cooling: 500-ton units	168
11.1	Contribution format of the income statement	174
11.2	Balance sheet	175
11.3	Funds statement	177

Preface and Acknowledgements

This book is a result of two seminars held at Rutgers - The State University of New Jersey on 1 November 1985 and 2 May 1986 entitled 'Regulating Utilities in an Era of Deregulation'. Eight previous seminars in the same series resulted in *Problems in Public Utility Economics and Regulation* (1979), *Issues in Public Utility Pricing and Regulation* (1980), *Regulatory Reform and Public Utilities* (1982), and *Analyzing the Impact of Regulatory Change in Public Utilities* (1985).

Like the previous seminars, these seminars received financial support from leading utilities companies. The views expressed, of course, are those of the authors and do not necessarily reflect the views of the sponsoring companies. I thank Atlantic Electric Company, Commonwealth Water Company, Elizabethtown Gas Company, Elizabethtown Water Company, Garden State Water Company, GTE Service Company, Hackensack Water Company, Jersey Central Power & Light Company, Middlesex Water Company, Monmouth Consolidated Water Company, New Jersey Bell Telephone Company, New Jersey Natural Gas Company, New Jersey Water Company, New York Telephone Company, Northeast Utilities Company, NYNEX Service Company, Public Service Electric and Gas Company, Rockland Electric Company, Shorelands Water Company, South Jersey Gas Company and United Telephone Company of New Jersey. The support went far beyond financial assistance. Company managers freely gave their time and advice and on several occasions provided information about their industries. Their wise counsel was especially useful to me in striving to achieve clarity of exposition and relevance to industry and regulatory problems both at the seminars and in the chapters of this book. I especially thank James Alleman, George Baulig, Bert Blewitt, Frank Cassidy, Bill Cobb, Lawrence Codey, Larry Cole, Frank Delany, A. Noel Doherty, Russ Fleming, Edward Jones, Pat Keefe, James Lees, Clifford Mastrangelo, Edwin Overcast, Henry Patterson III, Glenn Phillips, Don Schlenger, Joseph Schuh, Paul Schumann, Neal Stolleman, Richard Tompkins, Michael Walsh and George Wickard.

Many thanks are owed to the distinguished speakers and discussants, listed on pages xi and xii, for their cooperation in making the seminars and
